§2 Cauchy-Schwarz

sliding slats in frictional contact

before

after

But kinetic energy dissipates :

before

after

$$\sum \frac{1}{2} m v^2 \geq \frac{1}{2} (\sum m) \langle v \rangle^2$$

$$\sum m \sum m v^2 \geq (\sum m v)^2$$

Change variables $m \rightarrow m^2$
 $v \rightarrow v/m$ to get

$$\sum m^2 \sum v^2 \geq (\sum m v)^2$$
