THE HONG KONG
UNIVERSITY OF SCIENCE
AND TECHNOLOGY

UNDERGRADUATE RECRUIT
AND ADMISSIONS OFFICE

A Degree That's Tailor Made For The Fast-changing World

For most of 2020, we all ponder how to best support students as they strive to sharpen their edge in an increasingly challenging future. One easy to implement solution could be to take multi-faceted college courses via which our students would broaden their knowledge bases and build cross-disciplinary mindset. Arm themselves with a measurable advantage in what is sure to be an ever-more competitive world.

Early to spot the profound implications the year 2020 had for students, The Hong Kong University of Science and Technology is now accepting applications for two additional cross-disciplinary study modes for academic year 2021.

1. Science with an Extended Major in Artificial Intelligence [click here for details]

2. Engineering with an Extended Major in Artificial Intelligence [click here for details]

The new options will join a comprehensive menu of interdisciplinary and joint school programs that already spans the following academic options:

- Biotechnology and Business
- Data Science and Technology
- Dual Degree in Technology and Management [5-year program]
- Environmental Management and Technology
- Global China Studies
- Individualized Interdisciplinary Major
- Integrated System and Design
- Mathematics and Economics
- Quantitative Social Analysis
- Risk Management and Business Intelligence

Submit application by 20 Nov and receive an early decision by Dec 2020.
